

Aditya Enterprises

Manufacturer & Fabricator

Engineered for strength, Precision & Durability

About Us

AEM is into the Business of Industrial Steel Fabrication with 100% in house facility and process capabilities.

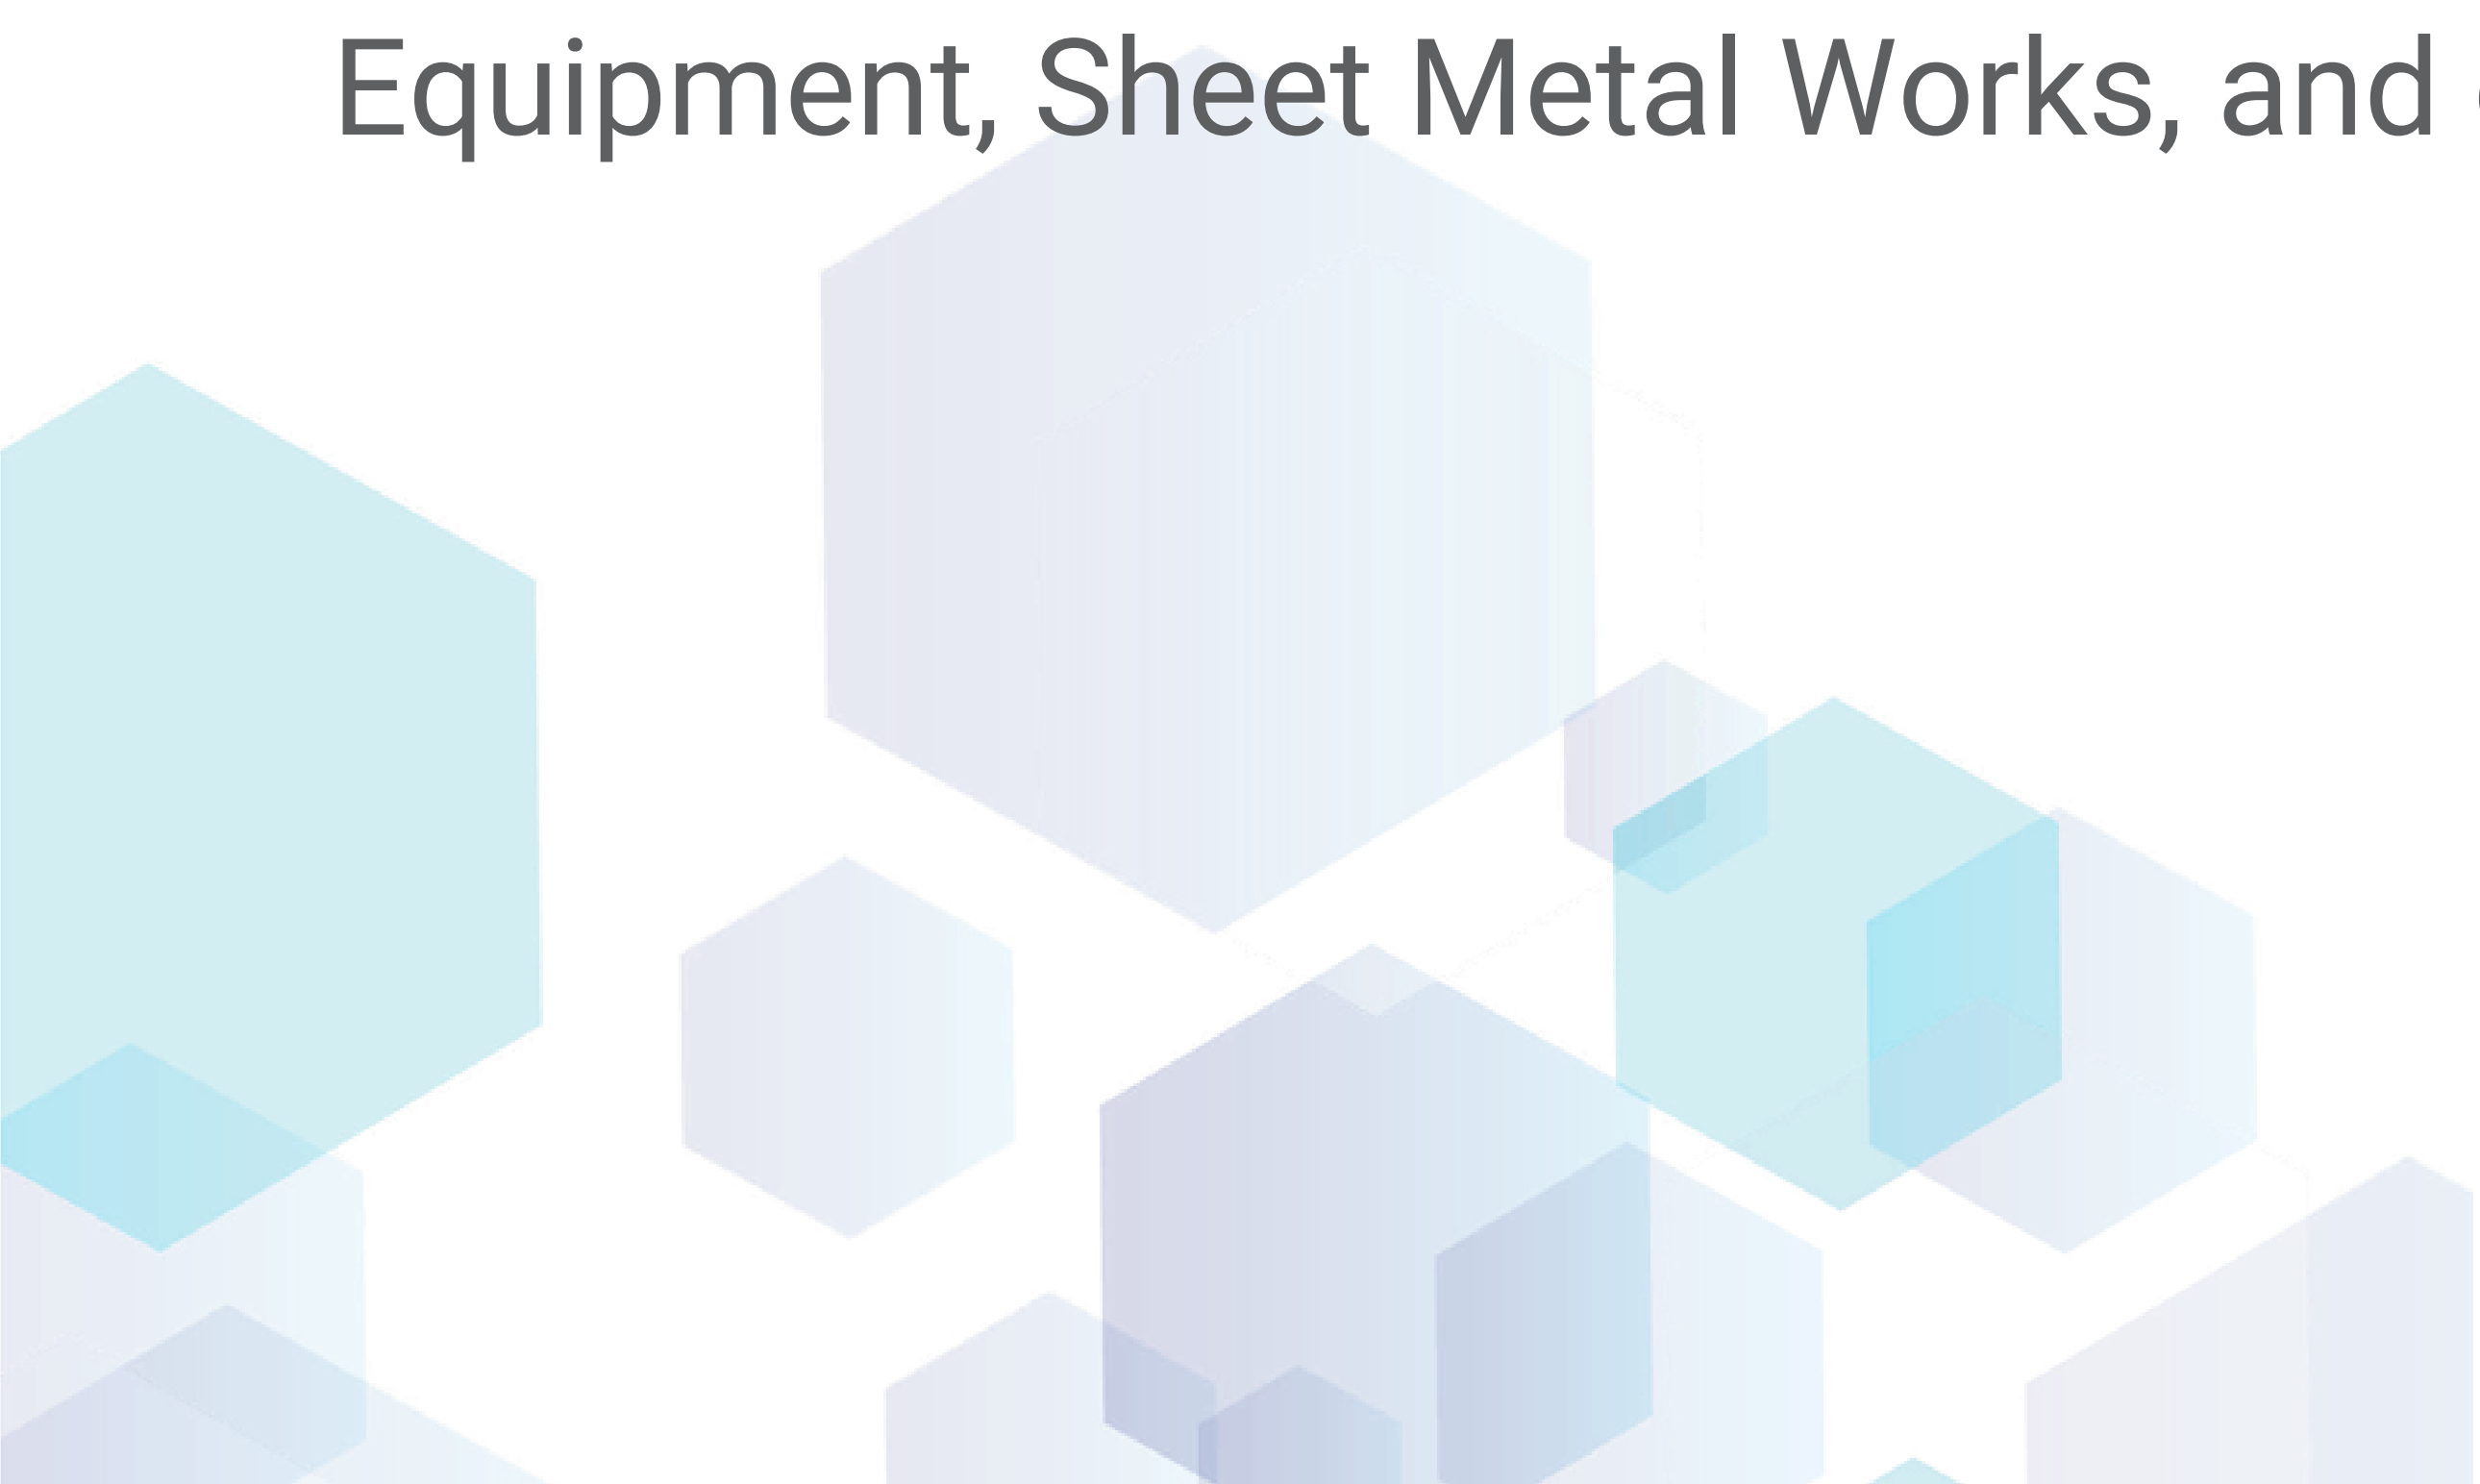

Aditya Enterprises is one of the leading and fast-growing Steel Fabrication Company that provides Engineering solutions to various industries such as Cement Industry, Power Plants, Automobiles, Metal Construction Industry, Chemical, Rubber, Oil and Gas, Architectural Fabrication etc.

AEM strengths include compliance with client's specifications, setting new quality standards, surpassing clients' expectations, conformance with international standards, constant up-gradation of manufacturing processes and infrastructure, competent production team, efficient project management, competitive pricing, adherence to delivery schedules, innovative guidelines for packing and assembly, continual improvement and unwavering support service.

Company history at a glance

AEM's core competency lies in HeavySteel Fabrication and Supply Including :-

Machining and Assembly of Steel Structures, Material Handling Equipment, Sheet Metal Works, and other Sheet Metal Components

Why Choose us?

Our team consists of [highly skilled](#) and [experienced](#) professionals dedicated to precision, innovation, and efficiency. From designing cutting-edge systems to executing and managing projects seamlessly, our team ensures excellence at every stage. Our technical staff plays a crucial role in overseeing project execution and management, ensuring smooth operations and timely delivery. Through our commitment to quality, professionalism, and customer satisfaction, Aditya Enterprises has established itself as a dependable and trusted facility services organization. Our consistent track record of successful project completion has earned us the confidence of a growing list of esteemed clients.

Tool Cabinets Manufactures

These Tool Cabinet take up very little space, but are versatile they can be used to [store tools, different work materials, and small parts](#). Its basic structure consists of 6 different cabinet compartments with identical surface areas.

The cabinets inner areas can be installed with drawers with face heights of 75 – 300 mm, in combinations of standard and full pull-out models.

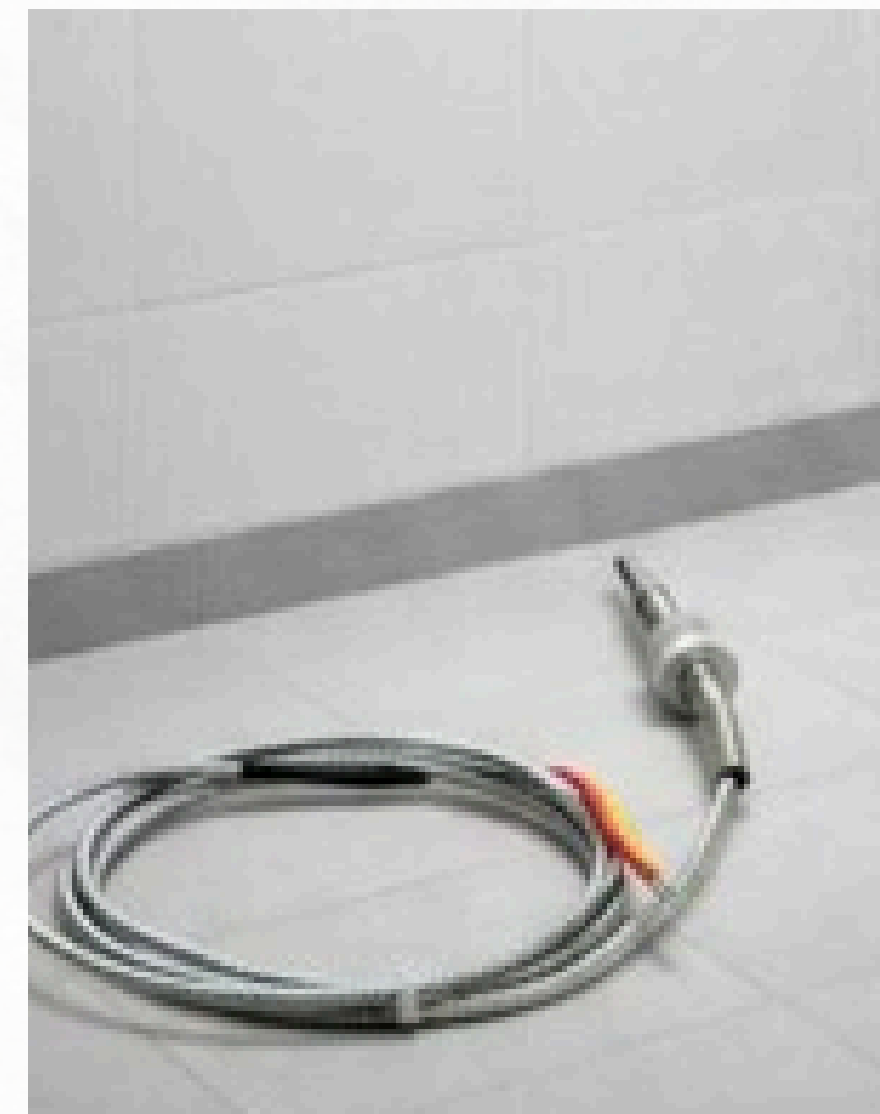

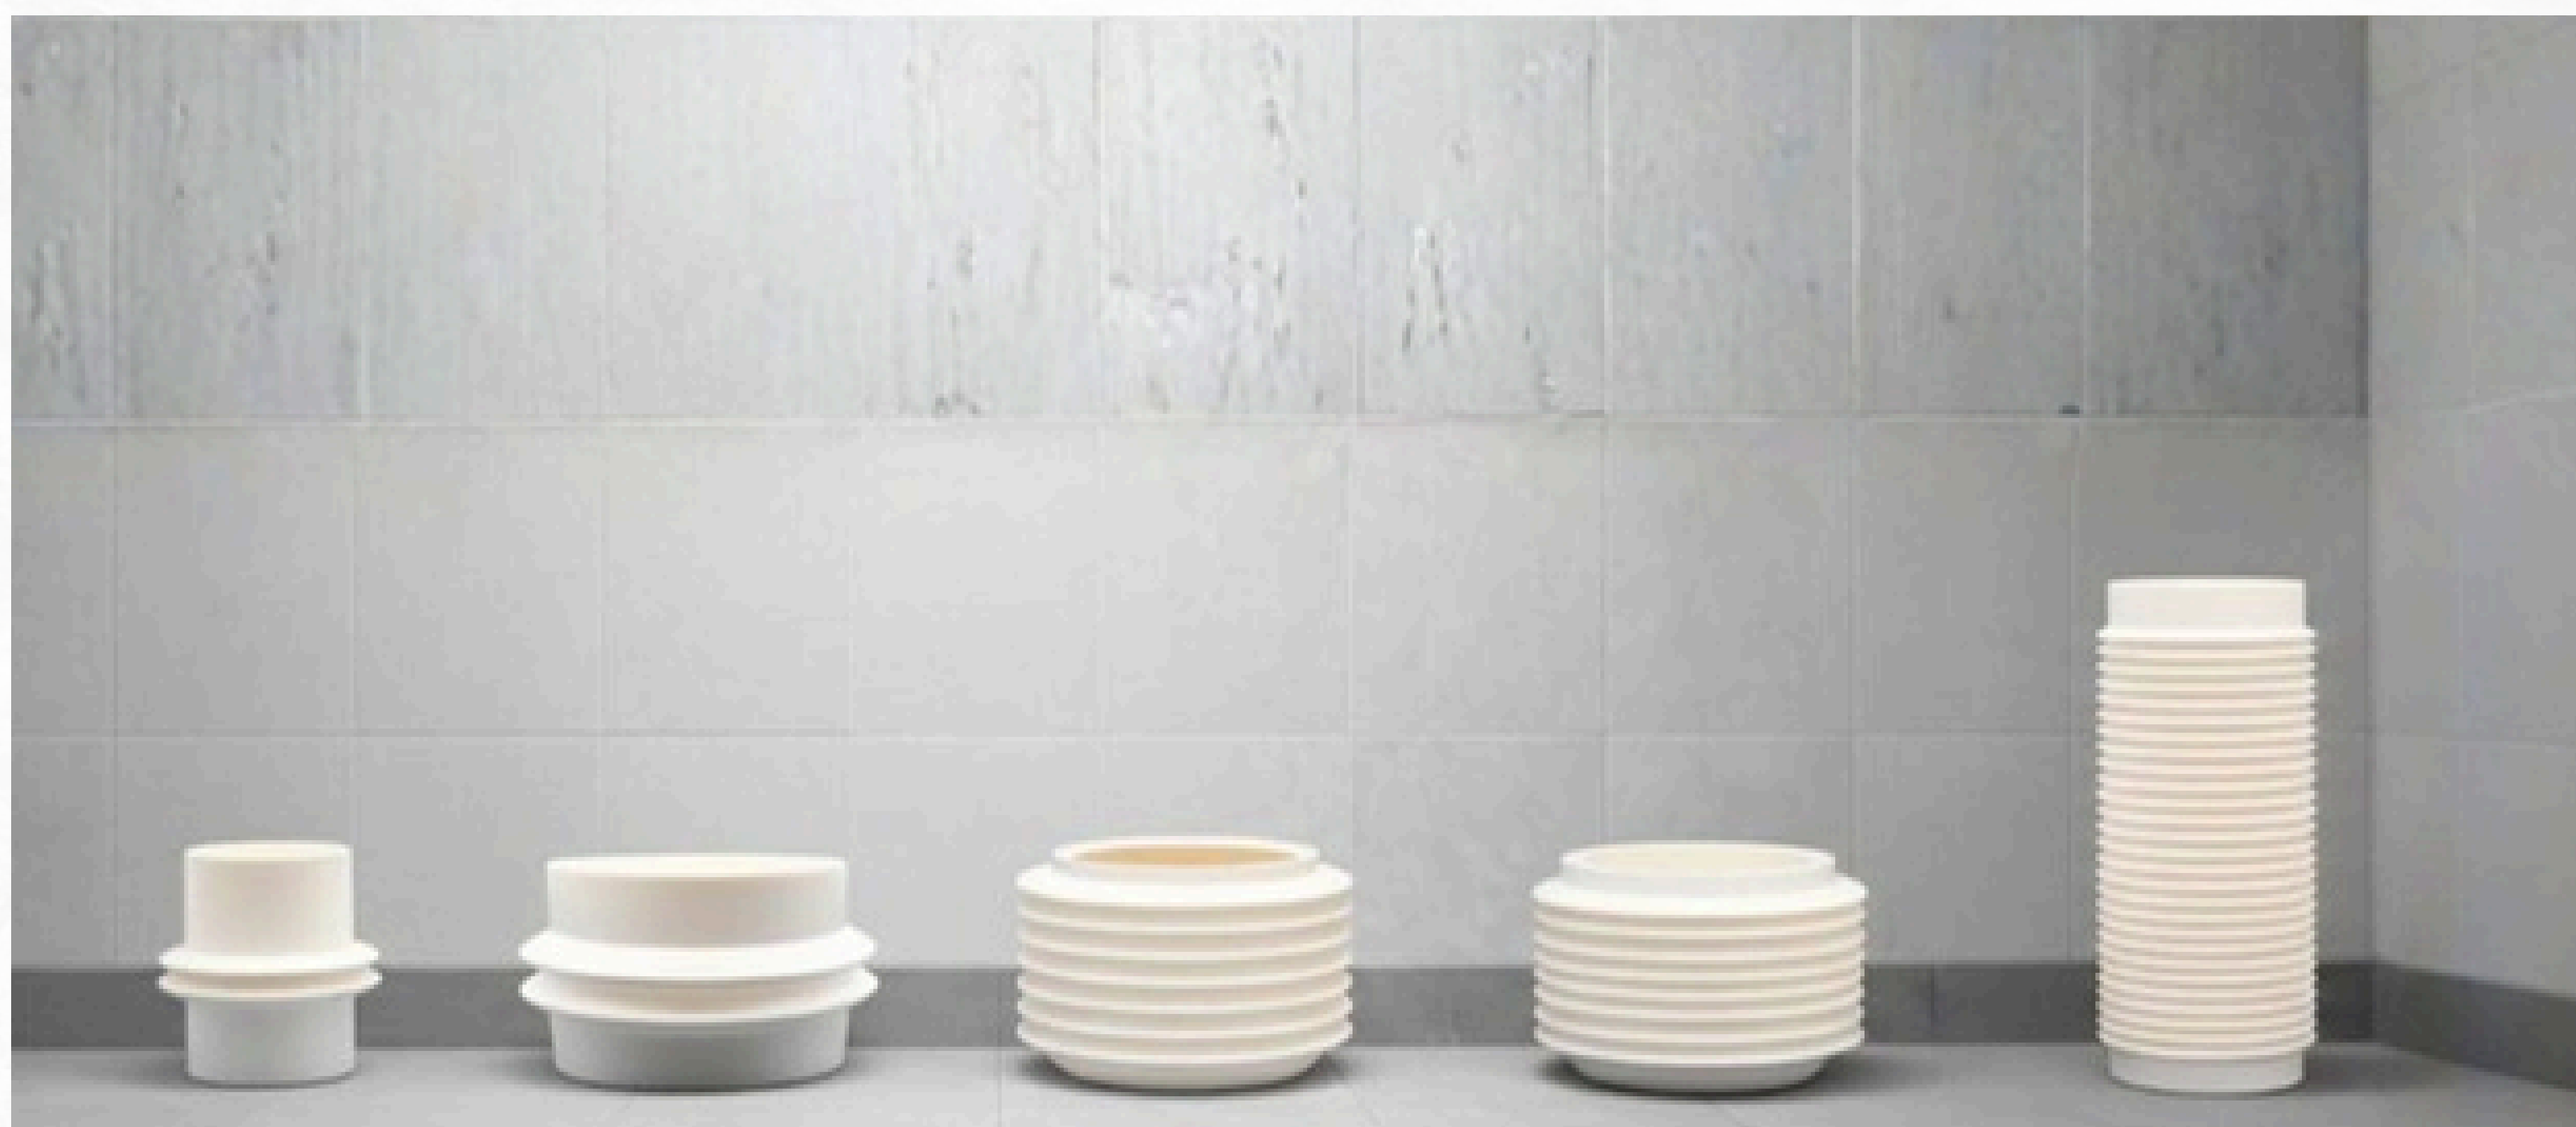

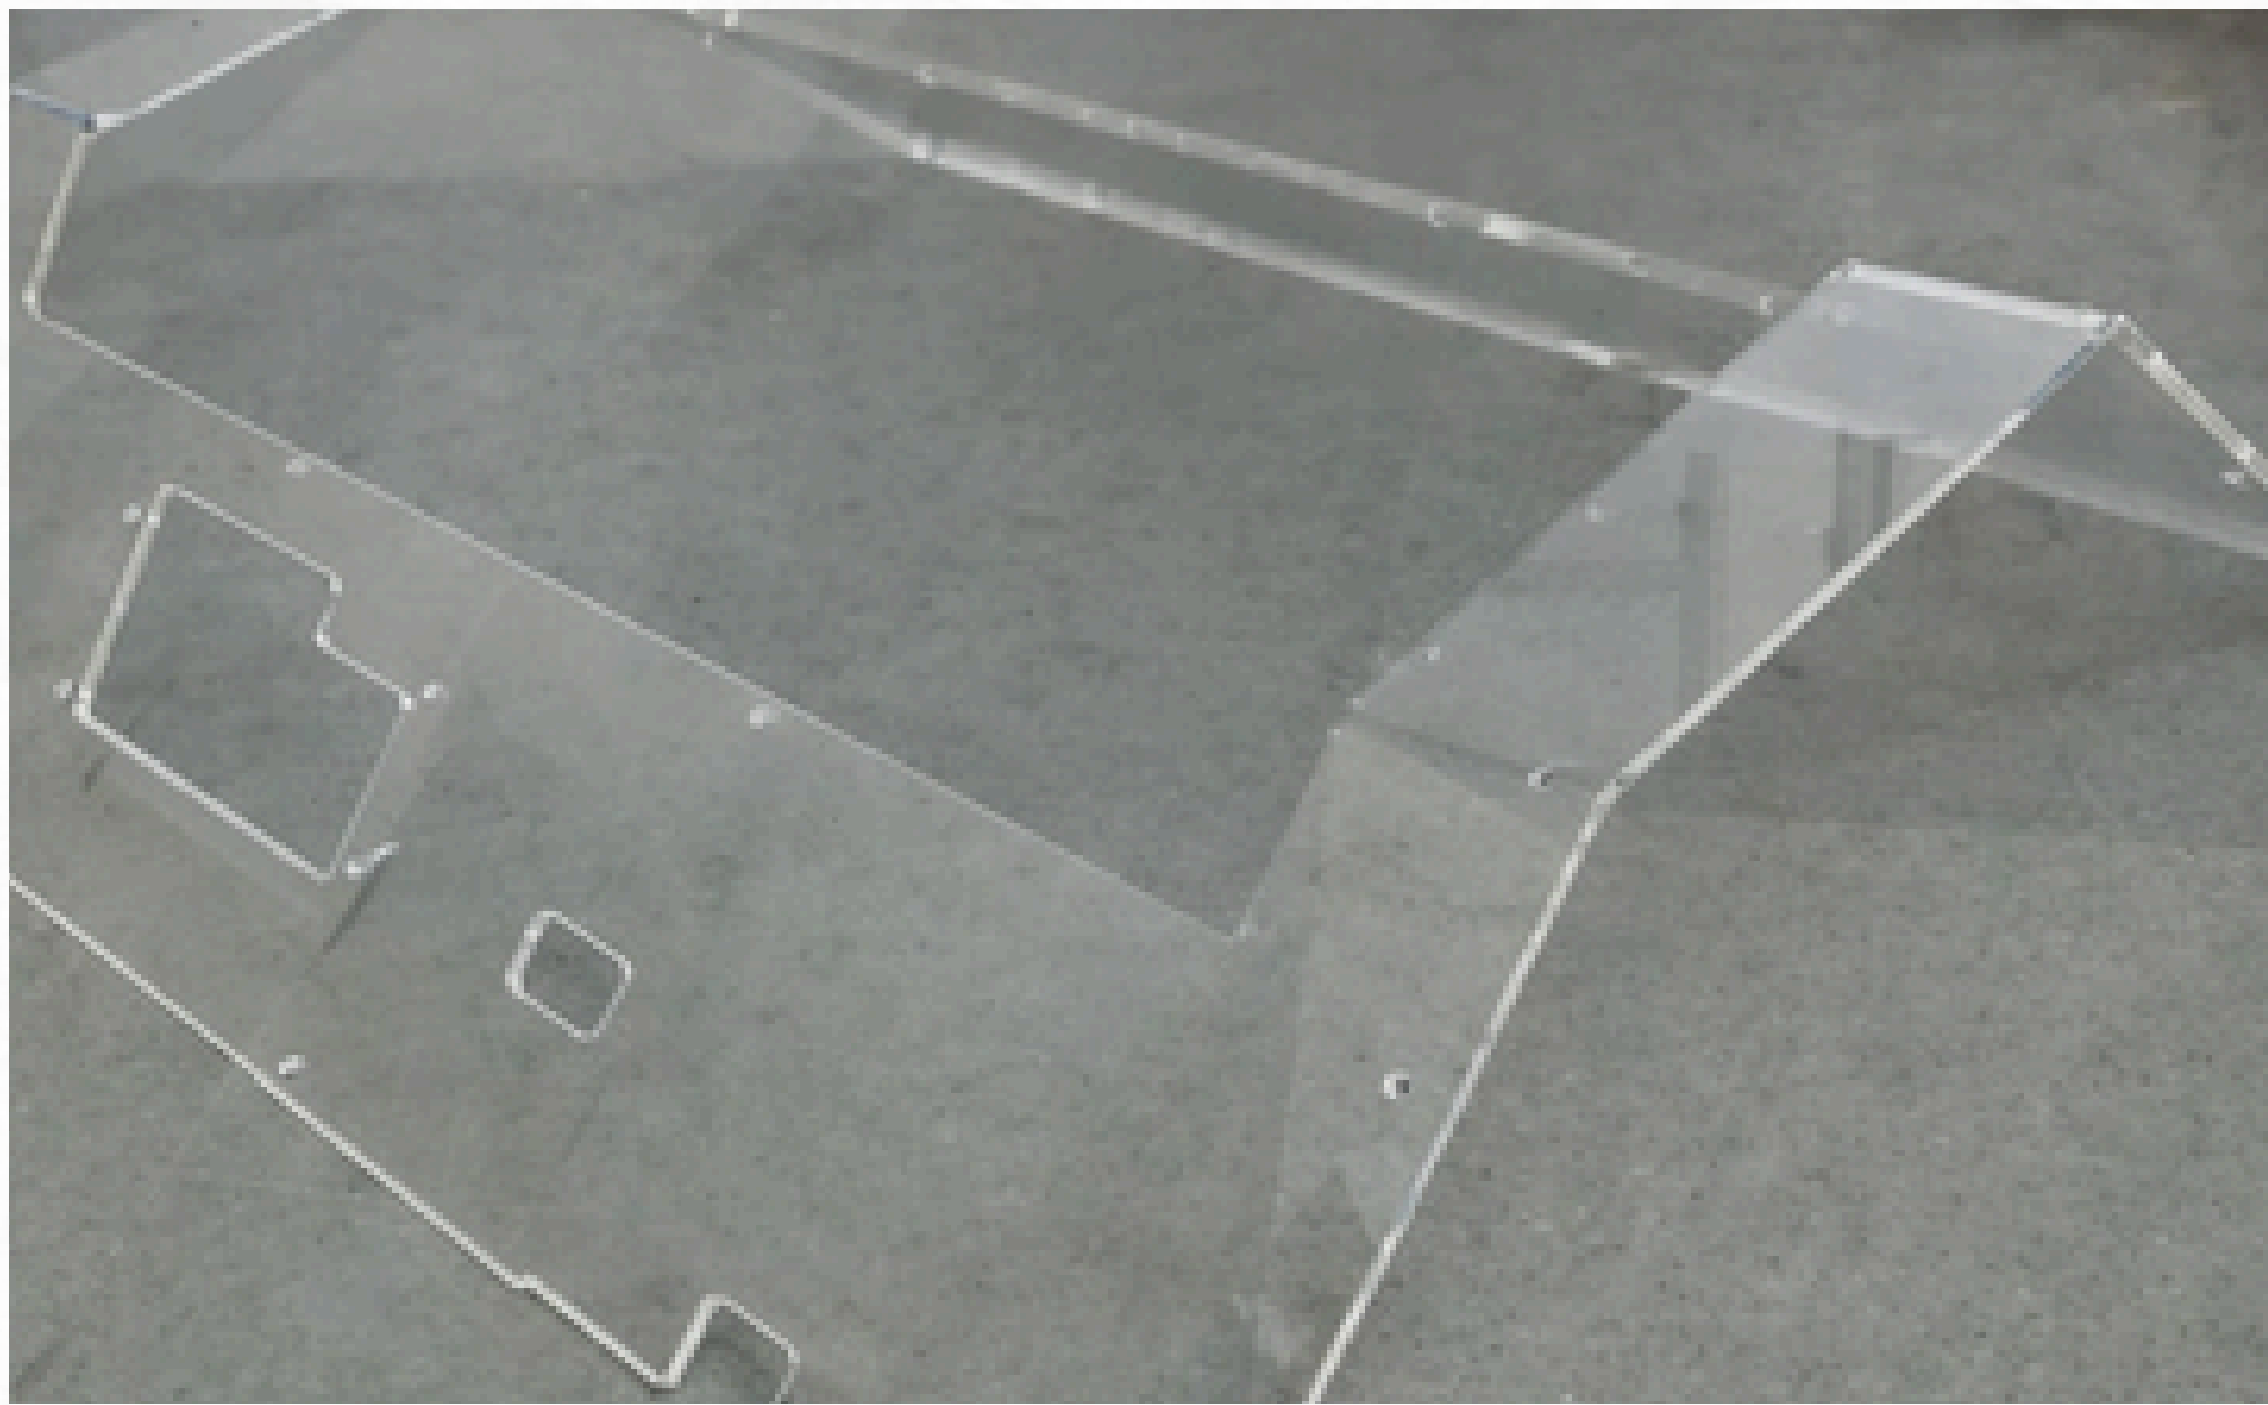

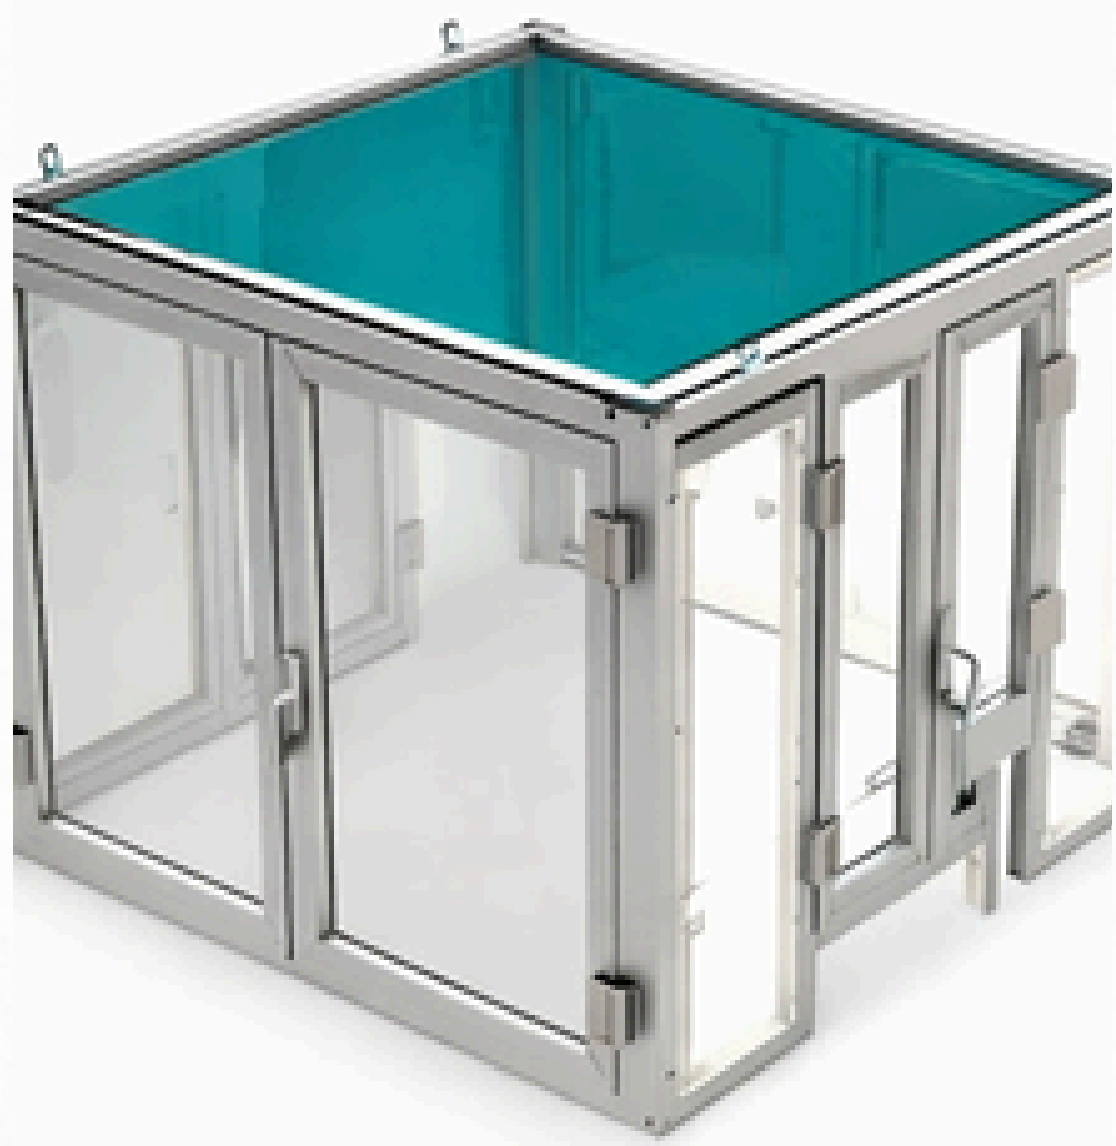

- Create a safe and efficient working environment
- Neat appearance improves the look of the working area
- High storage volume
- Fully lockable, increasing security for valuable items
- Items stored in drawers are kept free from dust and contaminants
- Easy access to all goods stored – small items at the rear of the drawer can be freely accessed
- Drawers are fully divisible to suit individual applications
- Small components can be stored in high density, saving space
- Encourages correct handling procedures for heavier items
- Wide variety of drawer weight capacities allows the correct cabinet to be specified for the task

Application :

- All types of industry like Automobile, Machinery Manufacturer, Defense, Aeronautical, General Engineering, Electronic, Textile, Chemical, Pharmaceuticals, R. & D. etc.
- Also suitable for Automobile service center, Hospitals, Hardware and General Store

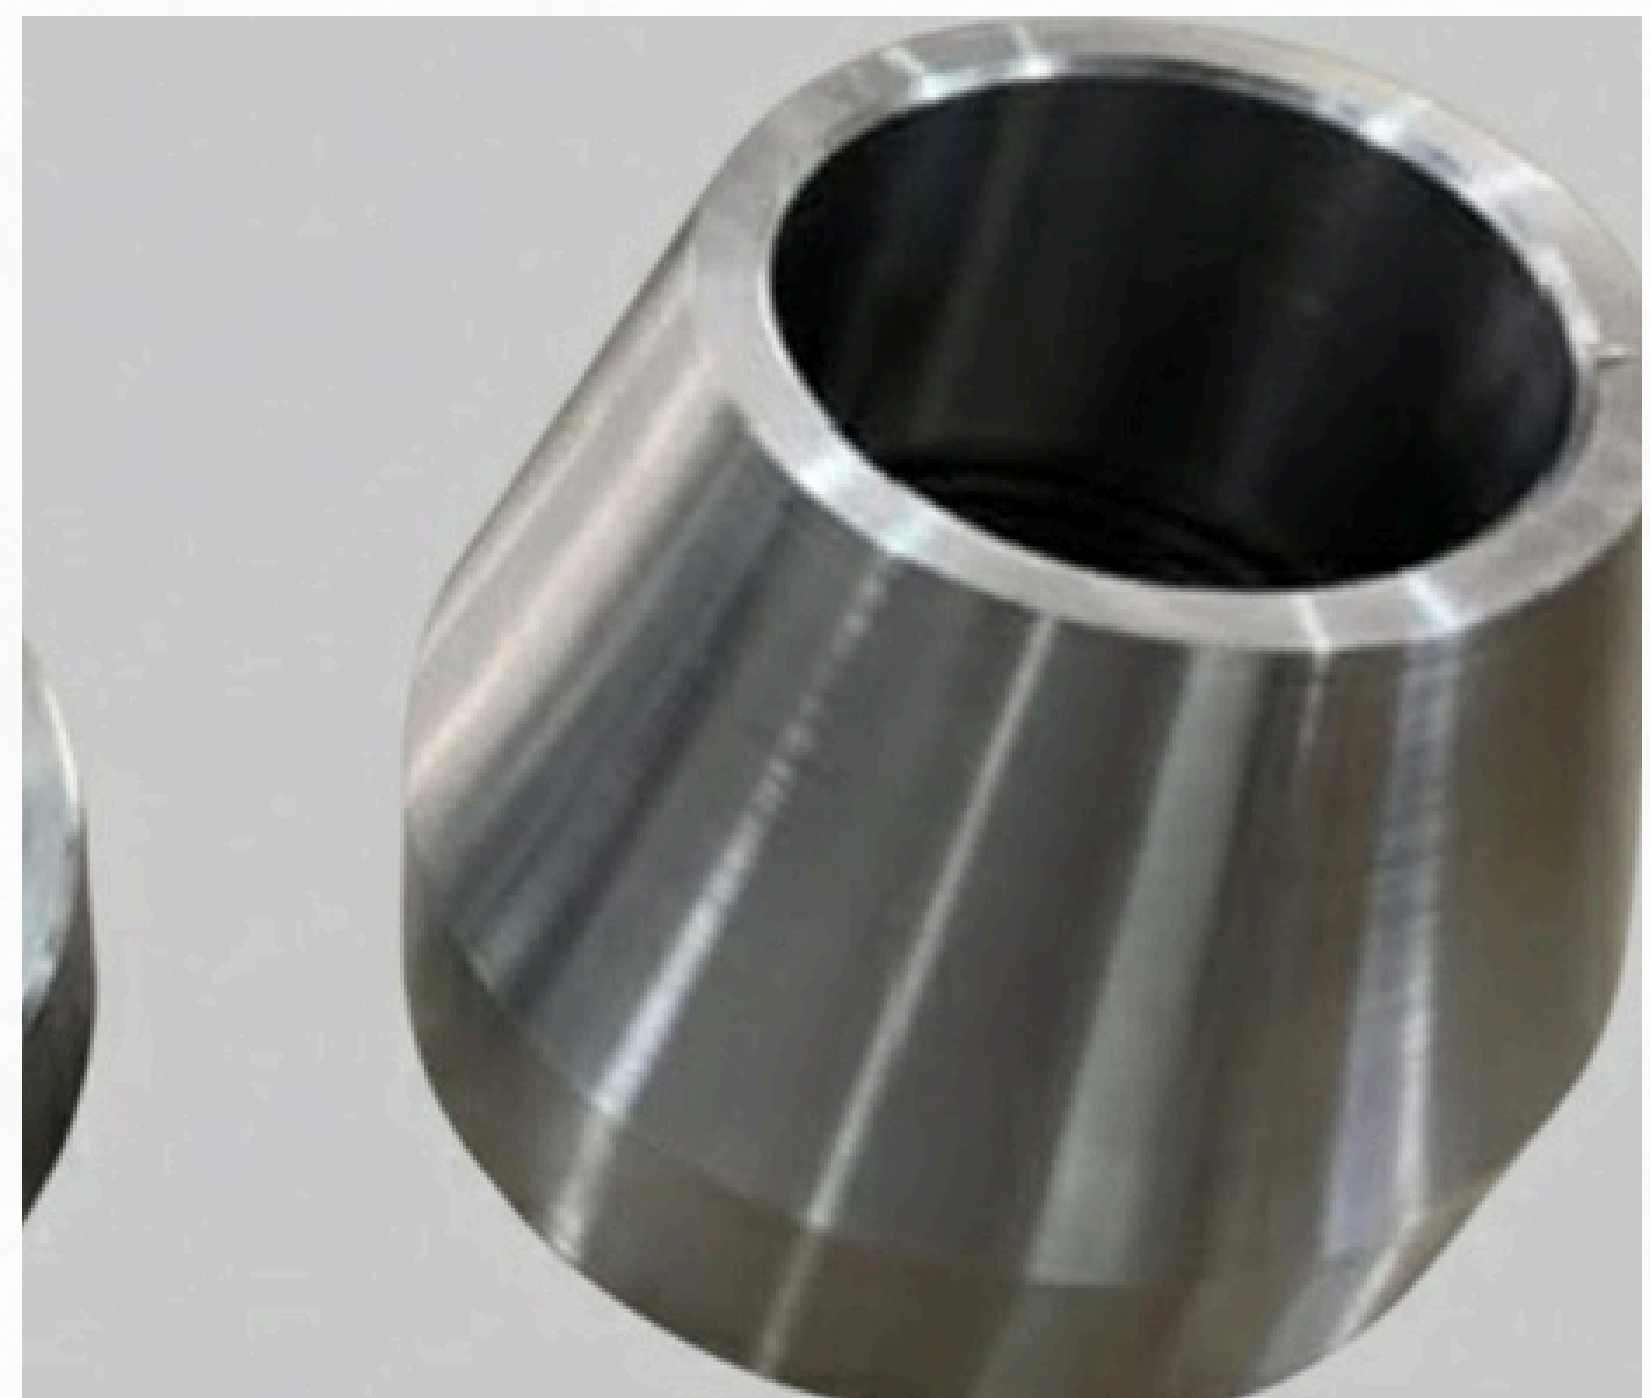

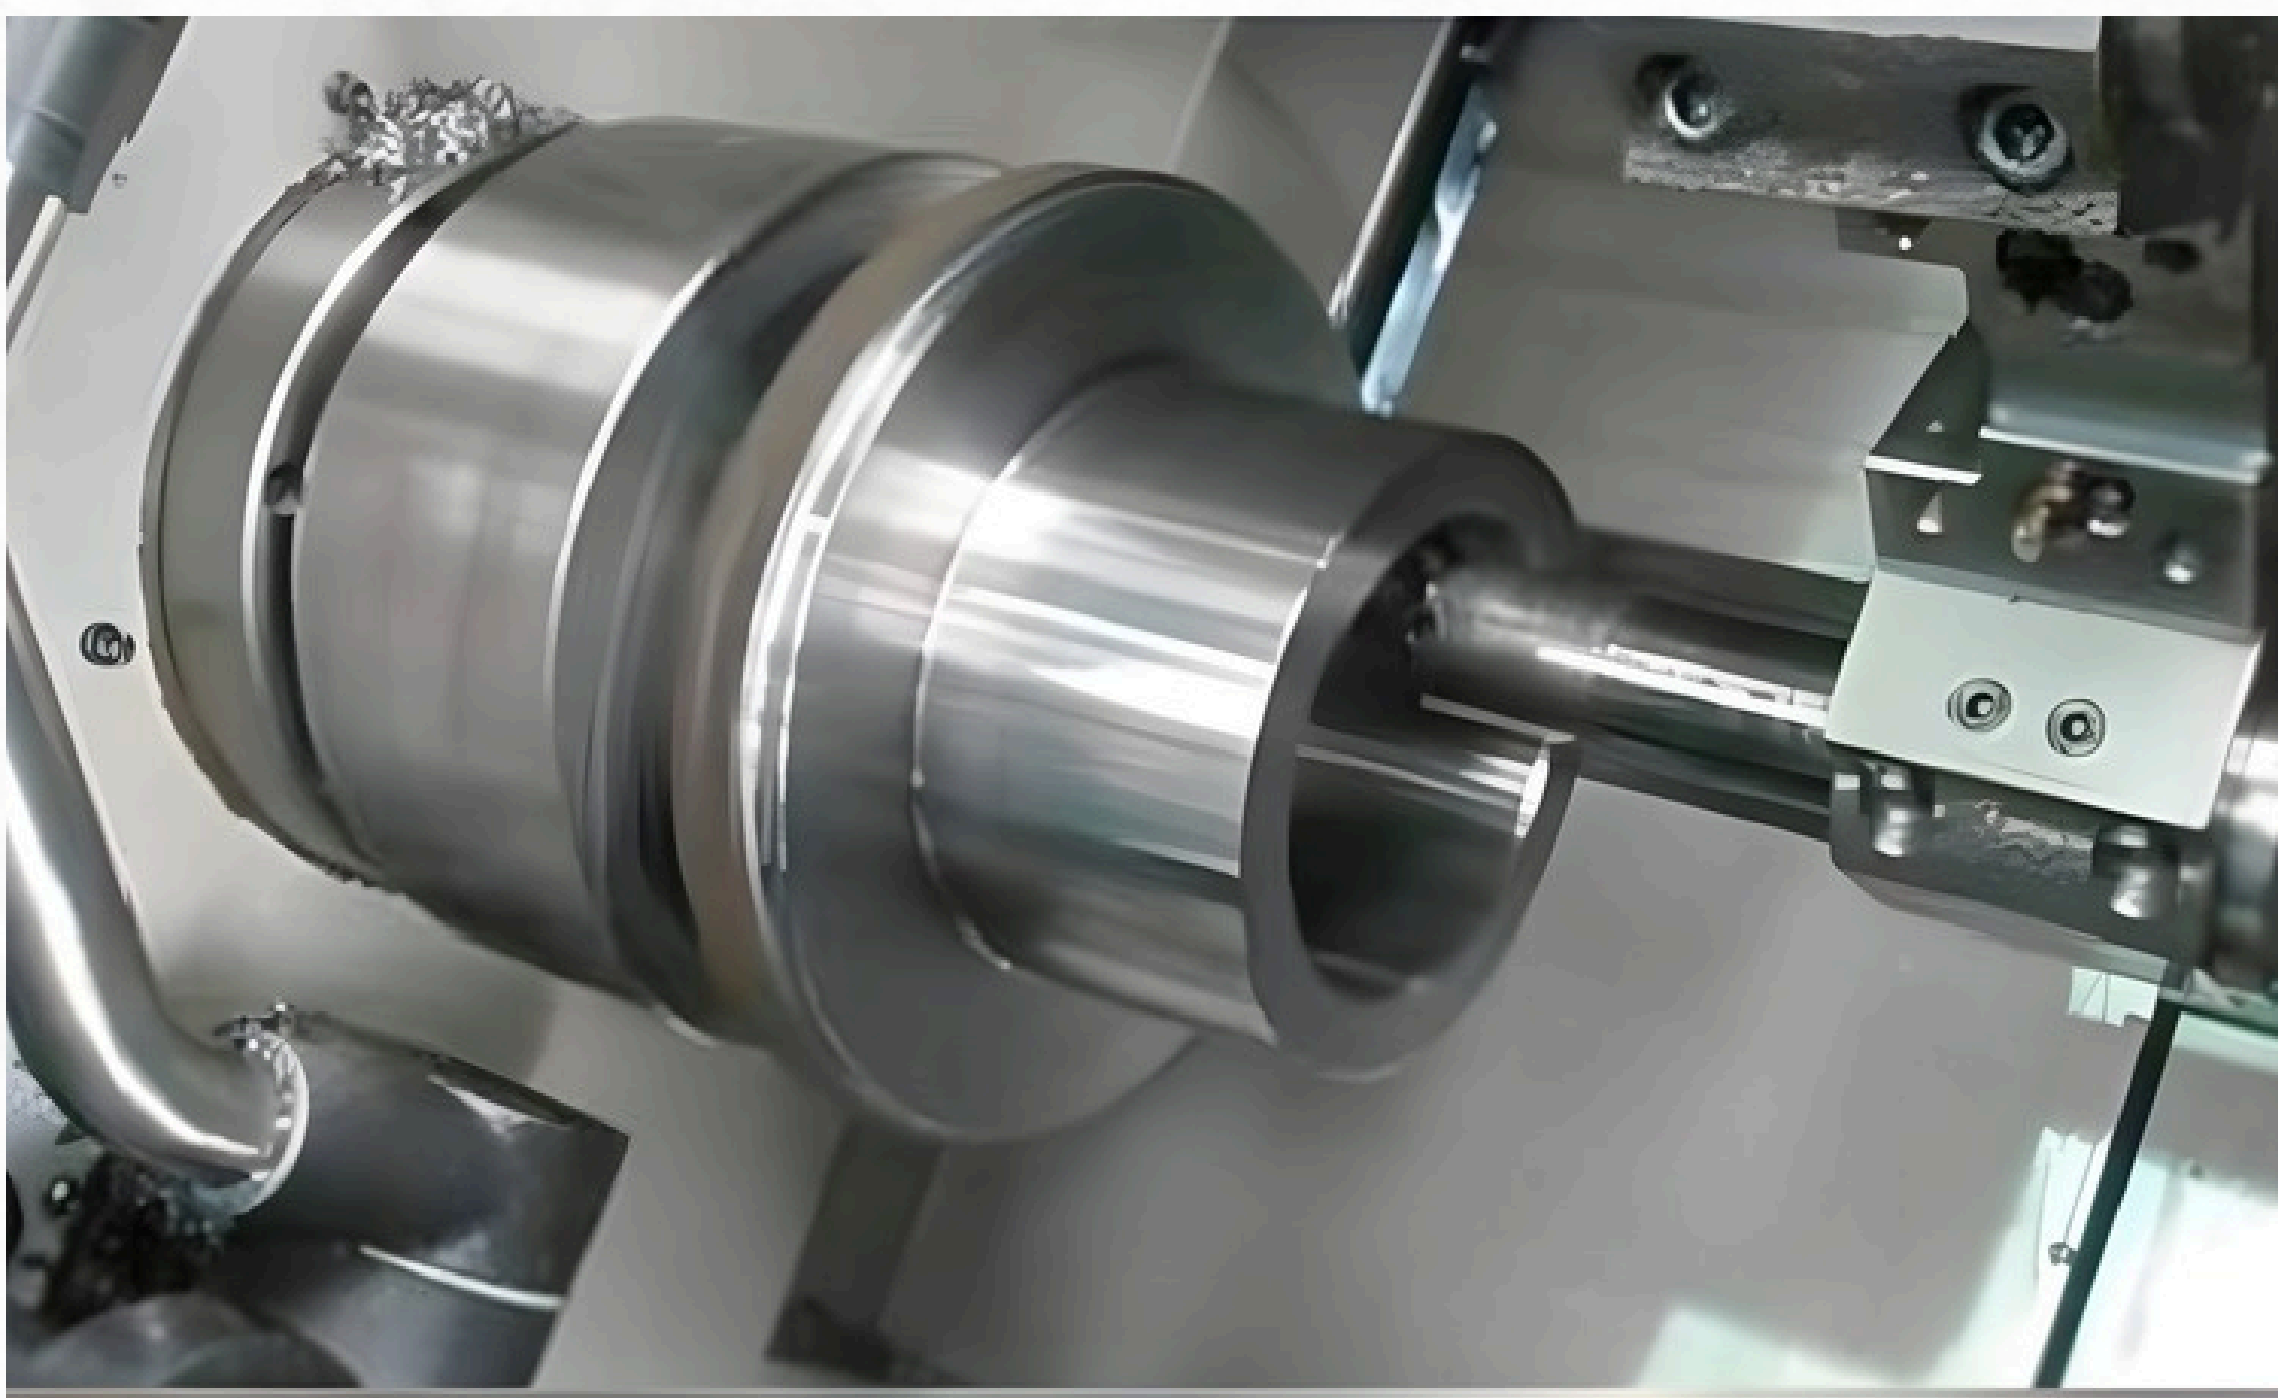

Polycarbonate Arclyic sheet Customised Products

We supply food-grade, industrial, and pneumatic components from trusted brands.

Our services include engineering solutions and precision machining.
